SUMMARY

Software Developer with 1 year of hands-on experience building SaaS platforms using TypeScript, NestJS, and Next.js. Skilled in REST APIs, PostgreSQL, Docker, and CI/CD pipelines, with a strong foundation in Data Science (M.Tech, JMI — AIR 1). Quick learner with a focus on writing clean, scalable code in Agile teams.

EXPERIENCE

Software Developer Intern

Riskflow LLC

10/2025 - 03/2026 | Remote

- Architected and developed two core multi-tenant SaaS compliance platforms (Complied and Vodazok) using TypeScript, NestJS, and Next.js, serving enterprise clients with 99.9% uptime.
- Designed and implemented granular RBAC/ABAC security models and high-throughput background job processing using Redis and BullMQ, improving task processing efficiency.
- Established comprehensive GitLab CI/CD pipelines and deployed microservices via Docker and Nginx, reducing deployment time by 40%.
- Engineered a monorepo architecture that improved code reusability across services and accelerated build times by 15%.
- Integrated HPD Government APIs and automated email/SMS notifications via SendGrid and Twilio using asynchronous queues, reducing manual compliance auditing efforts by 40%.

Full Stack Developer Intern

Segritude Games

03/2024 - 09/2024 | Remote

- Developed a real-time clock-in system using Discord.js, Node.js, and MongoDB, efficiently handling concurrent user requests.
- Containerized the application using Docker and orchestrated deployment on a VPS, achieving 99.8% uptime across production environments.
- Built a React-based administrative dashboard for bot management, streamlining client onboarding for multiple SaaS clients.

PROJECTS

Complied - NYC Lead-Safe Compliance Platform

- Architected a production-grade multi-tenant SaaS platform for NYC compliance, achieving 99.9% uptime with average API response times under 200ms.
- Integrated HPD Government APIs and automated email/SMS notifications via SendGrid and Twilio using asynchronous BullMQ queues.
- Implemented proactive monitoring using Sentry and New Relic to identify and resolve performance bottlenecks in real time.

Riskflow - Compliance as a Service Platform

- Led backend development of a HIPAA and SOC 2 compliance platform using a microservices architecture and monorepo structure.
- Integrated Stripe for subscription billing and built automated PDF generation for security risk assessment reports.
- Reduced manual compliance auditing efforts by 40% through automated policy generation modules.
